

IMPORTANT INFORMATION ABOUT CRESTOR® (ROSUVASTATIN CALCIUM)

Please read this summary carefully and then ask your health care professional about CRESTOR. No advertisement can provide all the information needed to determine if a drug is right for you. This advertisement does not take the place of careful discussions with your health care professional.

Only your health care professional has the training to help weigh the risks and benefits of a prescription drug.

WHAT IS CRESTOR?

CRESTOR is a prescription medicine that belongs to a group of cholesterol-lowering medicines called statins. Along with diet, CRESTOR lowers "bad" cholesterol (LDL-C), increases "good" cholesterol (HDL-C), and also slows the progression of atherosclerosis in adults with high cholesterol, as part of a treatment plan to lower cholesterol to goal.

WHAT IS CHOLESTEROL?

Cholesterol is a fatty substance, also called a lipid, normally found in your bloodstream. Your body needs a certain amount of cholesterol to function properly. But high cholesterol can lead to health problems. LDL-C is called bad cholesterol because if you have too much in your bloodstream, it can become a danger to your health and can lead to potentially serious conditions. HDL-C is known as good cholesterol because it may help remove excess cholesterol. Common health factors such as diabetes, high blood pressure, smoking, obesity, family history of early heart disease, and age can make controlling your cholesterol even more important.

WHAT IS ATHEROSCLEROSIS?

Atherosclerosis is the progressive buildup of plaque in the arteries over time. One major cause is high levels of LDL-C. Other health factors, such as family history, diabetes, high blood pressure, or if you smoke or are overweight, may also play a role in the formation of plaque in arteries. Often this plaque starts building up in arteries in early adulthood and gets worse over time.

HOW DOES CRESTOR WORK?

Most of the cholesterol in your blood is made in the liver. CRESTOR works by reducing cholesterol in two ways: CRESTOR blocks an enzyme in the liver causing the liver to make less cholesterol, and CRESTOR increases the uptake and breakdown by the liver of cholesterol already in the blood.

WHO SHOULD NOT TAKE CRESTOR?

Do not take CRESTOR if you

- are pregnant or think you may be pregnant, or are planning to become pregnant. CRESTOR may harm your unborn baby. If you become pregnant, stop taking CRESTOR and call your health care professional right away
- are breast-feeding. CRESTOR can pass into your breast milk and may harm your baby
- have liver problems
- have had an allergic reaction to CRESTOR or are allergic to any of its ingredients. The active ingredient is rosuvastatin calcium. The inactive ingredients are microcrystalline cellulose, lactose monohydrate, tribasic calcium phosphate, crospovidone, magnesium stearate, hypromellose, triacetin, titanium dioxide, yellow ferric oxide, and red ferric oxide

The safety and effectiveness of CRESTOR have not been established in children.

HOW SHOULD I TAKE CRESTOR?

- Take CRESTOR exactly as prescribed by your health care professional. Do not change your dose or stop CRESTOR without talking to your health care professional, even if you are feeling well
- Your health care professional may do blood tests to check your cholesterol levels before and during your treatment with CRESTOR. Your dose of CRESTOR may be changed based on these blood test results
- CRESTOR can be taken at any time of day, with or without food
- Swallow the tablets whole
- Your health care professional should start you on a cholesterol-lowering diet before giving you CRESTOR. Stay on this diet when you take CRESTOR
- Wait at least 2 hours after taking CRESTOR to take an antacid that contains a combination of aluminum and magnesium hydroxide
- If you miss a dose of CRESTOR, take it as soon as you remember. However, **do not take 2 doses of CRESTOR within 12 hours of each other**
- If you take too much CRESTOR or overdose, call your health care professional or Poison Control Center right away or go to the nearest emergency room

WHAT SHOULD I TELL MY HEALTH CARE PROFESSIONAL BEFORE TAKING CRESTOR?

Tell your health care professional if you

- have a history of muscle pain or weakness
- are pregnant or think you may be pregnant, or are planning to become pregnant
- are breast-feeding
- drink more than 2 glasses of alcohol daily
- have liver problems
- have kidney problems
- have thyroid problems
- are Asian or of Asian descent

Tell your health care professional about all medicines you take or plan to take, including prescription and non-prescription medicines, vitamins, and herbal supplements. Some medicines may interact with CRESTOR, causing side effects. It is particularly important to tell your health care professional if you are taking or plan to take medicines for

- your immune system
- cholesterol/triglycerides
- blood thinning
- HIV/AIDS
- preventing pregnancy

Know all of the medicines you take and what they look like. It's always a good idea to check that you have the right prescription before you leave the pharmacy and before you take any medicine.

(continued)

Keep a list of your medicines with you to show your health care professional. If you need to go to the hospital or have surgery, tell all of your health care professionals about all medicines that you are taking.

WHAT ARE THE POSSIBLE SIDE EFFECTS OF CRESTOR?

CRESTOR can cause side effects in some people.

Serious side effects may include:

Muscle problems. Call your health care professional right away if you experience unexplained muscle pain, tenderness, or weakness, especially with fever. This may be an early sign of a rare muscle problem that could lead to serious kidney problems. The risk of muscle problems is greater in people who are 65 years of age or older, or who already have thyroid or kidney problems. The chance of muscle problems may be increased if you are taking certain other medicines with CRESTOR.

Liver problems. Your health care professional should do blood tests before you start taking CRESTOR and during treatment to check for signs of possible liver problems.

The most common side effects may include headache, muscle aches and pains, abdominal pain, weakness, and nausea.

This is not a complete list of side effects of CRESTOR. Talk to your health care professional for a complete list or if you have side effects that bother you or that do not go away.

HOW DO I STORE CRESTOR?

Store CRESTOR at room temperature, 68-77°F (20-25°C), in a dry place. If your health care professional tells you to stop treatment or if your medicine is out of date, throw the medicine away. **Keep CRESTOR and all medicines in a secure place and out of the reach of children.**

WHERE CAN I GET MORE INFORMATION ABOUT CRESTOR?

Talk to your health care professional. Full Prescribing Information is available on CRESTOR.COM or by calling 1-800-CRESTOR.

GENERAL INFORMATION

It is important to take CRESTOR as prescribed and to discuss any health changes you experience while taking CRESTOR with your health care professional. Do not use CRESTOR for a condition for which it was not prescribed. Do not give CRESTOR to other people, even if they have the same medical condition you have. It may harm them.

NOTE: This summary provides important information about CRESTOR. For more information, please ask your health care professional about the full Prescribing Information and discuss it with him or her.
